## **DETAILED ACTION**

### ***Inventorship***

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "determining allocation sites" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The drawings are further objected to because of typographical error at Figure 9. Correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2171

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention because:

at claims 1, 8, 9, 10, 17, 18, it is not clear

- how “each method M” plays a role in the method steps for construction a call graph?
- how each field F relates to “each method M” in the claimed method steps for constructing a call graph?
- “the allocation sites” lack antecedent basis
- “the set of directly called methods” lacks antecedent basis
- “the set of virtually called methods” lack antecedent basis

at claims 2, 11 “adding T...method M” is not understood. Therefore, the limitation cannot be ascertained

at claims 6, 7, 15, 16, “the call graph computed above” lacks antecedent basis.

Due to the ambiguous claim language, art rejection has not been applied to claims 1-18.
